OBJECTIVE

I want to become a professional web developer, and grow up in a good software engineering environment

EDUCATION

2019 - 2022

 Vocational School
Computer and Network
Engineering

PROFILE

a Front-End Developer, Strong understanding of the website industry. Creative, detail-oriented and solution-oriented. Ready to contribute to creating engaging and effective user experiences.

PERSONAL PROJECTS

have created several projects that are relevant to web developers, you can also see several projects in my portfolio, below are some examples.

G A D G E T Z O N E

2023 - Present

Built a full stack MERN project (MongoDB, Express.js, React, and Node.js), with a focus on building e-commerce websites. Using Next.js framework.

- create a site with the next.js framework, and a MongoDB database.
- using the MongoDB database, working on all parts of this website starting from design, technology used, front-end and back-end.
- using redux for state management, for the shopping cart section and more.

B M W C A R S

<https://github.com/MuhlsmailMks/bmwcars>

a website built with React JS, and implement an animation library.

- develop websites using modern technologies React JS, and handle debugging, bug fixes, and improve site functionality regularly.
- implemented React JS concepts like Components, JSX, Routing and Hooks.
- implement modern animations with React JS custom animation library.

T A S T Y C U I S I N E

<https://github.com/MuhlsmailMks/tastyCuisine>

Building a website powered by Rest API with a focus on culinary themes. This website was developed using HTML, CSS, and JQuery.

- connected to the public API, using the Ajax Rest API to display the food menu on the website.
- Refining the UI/UX design through the Figma platform, then integrating it with high pixel precision into the website structure with full dedication and precision.
- Create responsive websites on all devices with CSS/SASS.
